Musical Theater: An Appreciation

Synopsis

For Surveys of Musical Theater, Music Appreciation courses and Popular Culture Surveys.Â This unique historical survey illustrates the interaction of multiple artistic and dramatic considerations with an overview of the development of numerous popular musical theater genres. This introduction provides more than a history of musical theater, it studies the music within the shows to provide an understanding of the contributions of musical theater composers as clearly as the artistry of musical theater lyricists and librettists. The familiarity of the musical helps students understand how music functions in a song and a show, while giving them the vocabulary to discuss their perceptions.

Customer Reviews

I just had musical theatre with Dr. McLamore and used her book as a textbook for the class. I joked with all my friends that this is the type of book I would buy in stores for "fun" reading. It really is a great look at the history of musical theatre going back to the early Operas. It's nice to see a book back up that far and show where the roots of musical theatre are found. I have never found that in another book on musical theatre so this one is definitely a wonderful book to have. The book explores many musicals in detail complete with a plot synopsis of many of them and a deeper examination of some of the songs within them. It is really an amazing book. Any musical theatre fan would benefit from reading it:)

This book can be really expensive, but this seller offered me a used book for a great price. The book is in good condition considering it's used. We are reading the book in a Musical Theatre History

course, and it's a wonderful supplement. It covers everything that led to musicals being formed from the earliest operas through the 20th century. It's great!

Book was a little damaged, but I guess it doesn't matter since it's a rental.

good staff!

This book came very quickly, and it's less expensive than anything else I have looked at online! And it's in great condition!
