Spanish For The Busy Housewife

Synopsis

Learn to communicate effectively with your Spanish speaking help in just 5 hours! Have you always wanted to learn Spanish but never found the time or the right teacher? Are you having trouble communicating with your Spanish speaking help? Did you study Spanish in school but find yourself unable to construct even simple sentences in Spanish? This book is for homemakers in need of a Spanish beginners or refresher course. Due to our unique method of teaching, you will be amazed at how much Spanish you will learn and retain in just five hours! What makes this Spanish course special? Efficient Learning Our breakthrough method allows you to retain most if not all of what you learn and immediately put it to use. The key is interactivity: Instead of making you repeat words and sentences, you are encouraged to think and apply what you learned. Using the words and concepts you learn throughout the course, you will build Spanish sentences and translate Spanish sentences into English right from the start. The course also makes use of the many similarities between English and Spanish so you can associate new Spanish words with English words you already know. Relevance You'll learn relevant words and sentences that you can put to use immediately. This will allow you to reinforce what you've learned through real life practice and motivate you to complete the course. Speed This course only takes about five hours to complete. Many people buy expensive Spanish courses and never find the time to complete the course. But you should be able to find five hours. Even if you only study for half an hour each day, you'll be done in a little more than a week! Fun Learning should be fun and rewarding. It is hard to describe the pleasure you experience when you manage to construct complete sentences in Spanish after just half an hour into the course. In addition, the course is peppered with quotes and anecdotes, keeping the learning fun and exciting.

Customer Reviews

I found this book through a recommendation from a friend of mine, who had told me that this is the first approach to Spanish learning that seems to work with him. She hasn't finished the course but actually was able to formulate sentences to tell the help what needs to be done around the house. Even the help noticed!! I started this book as well (I have some basic knowledge of Spanish) and so far found it to be a useful approach to learning. It is not so "word memorizing oriented" and quickly challenges you to formulate your own sentences based on logic acquired in the book. The reason I give four out 5 stars is because I believe this book would work even better in the audio format. I can imagine using it while driving and progressing quite quickly through it. I hope the publishers take note.

Having Spanish speaking employees a friend of mine recommended "Spanish for the busy housewife" to me. I have used many methods in the past and concluded that I'm just not going to learn this language. I found I would need much more time and effort than I was willing to give up. Using Spanish for the busy housewife changed it all! Instead of waiting 3-4 hours into a lesson to get to the targeted scene and conversation I was learning Spanish for in the first place, David has put together an amazing combination of fundamentals and targeted scenes so that I was constantly engaged and made great progress picking up things up. Mucho Gracias!

This is a basic but helpful approach when you have to deal with basic concepts around the house. I have not finished the book yet, but I intend to what with all my other Spanish resources.

I bought this book for the Kindle, and although I am not particularly language talented, and never learned Spanish in school, I was amazed at how easy it was to pick up the basic rules and vocabulary using the methods in Spanish for the Busy Housewife. It is quick, fun and useful. I can heartily recommend it.
